

## **Dr Joseph Frasca**

Joseph Frasca graduated from the University of Adelaide Medical School in 1981. He did his Neurology training at Flinders Medical Centre and did further advanced training overseas in Neurophysiology at the University of Kentucky Medical Center and in Epilepsy at the New York University Medical Center.

He is currently a senior staff consultant Neurologist at the Flinders Medical Centre and a senior Lecturer in Neurology at the Flinders University.

He is a general Neurologist, but has particular interests in Epilepsy management and Epilepsy drug research and is a committee member of the Drugs and Devices Committee of the Epilepsy Association of Australia.

He is also involved and has extensive experience in using Botulinum Toxin for use in Neurological conditions such as Chronic Migraine, Cervical Dystonia and hemifacial spasm and blepharospasm.
